

ENVIRONMENTAL CHARTER

Aware of the richness and fragility of our environment, we place **sustainability** at the heart of our activity.

We have taken steps to obtain the **Green Key eco-label**, an international recognition that distinguishes tourist establishments committed to a demanding and proactive environmental management.

Each initiative that we set up aims to preserve the domain natural balance, to promote the well-being of our customers and our employees, and to make Château Gassies part of a **sustainable dynamic that respects its territory**.

Our responsible economic commitments

We favour **short supply chains** and **local partners** : wedding service providers, bakers, wine producers, etc. We also promote local hotels and restaurants to our customers.

Repairs are preferred over new purchases. We give furniture a **second life** by purchasing it at auction and restoring it. Unused furniture is donated to our staff and local charities.

Creation of a **gastronomic discovery activity** in partnership with local producers and a **beehive project**.

Our environmental commitments

14 hectares under "zero phyto" management, we promote a **sustainable ecosystem**: closed circuit, green waste valuation, organic orchard and vegetable garden, compost and rainwater reuse.

An **eco-responsible approach** : selective sorting, responsible in-house laundry management, eco-labelled cleaning products and refillable dispensers in the bathroom. A bicycle room is available for guests' use.

Optimizing energy consumption with **sustainable solutions** : solar-powered Velux windows, sensor-controlled lighting, and outdoor solar bollards. Room heating is automatically regulated, and rechargeable batteries are used for remote controls.

Our social commitments

12 employees

6 international employees

Welcoming students and trainees, providing rooms for presentations, local educational commitment.

1 employee with a disability

First aid training for staff

Organizing open days, regular flower donations to the EHPAD in our village and listing our defibrillator on the "Staying Alive" application.
