

ANAÏS MR. PHOTOGRAPHIE

Capturing authenticity, natural movement and raw emotions, for aesthetic memories that (really) looks like you.

My vision of a good wedding report is that you will be able to live and relive your day and its share of emotions all your life, through your photos.

I don't check off a checklist of images to create, I don't invent scenographies that will make you uncomfortable. In fact, I create for you what we call a wedding photoreport.

That is to say, I immortalize every moment of your big day by blending in with your favorite humans. I capture the highlights of your wedding but also the most fleeting moments, which create the sincerity of the emotions felt when you look at your images.

My great passion for fashion combines this approach with a more editorial and aesthetic part, to allow you to have photos together that are both very natural and more offbeat. And, I promise, you don't even need to know how to pose.

All in a timeless contemporary style so that your memories last through the years, always with modernity, without ever getting tired of them !

Oh and my name is Anaïs, but everyone calls me Ana (and I can't wait to hear your story) 🌍
