

The Artist

MELTEM SALB

Shooting weddings all over the world has been my profession for more than 10 years. What I enjoyed most during my travels was capturing the intimate and unique connection between people of different cultures and the scenery of foreign worlds.

Inspired by Fine Art Photography I love shooting in natural light to create timeless, warm and lively images or films. On your wedding day, I will focus on both, the little in-between moments like holding hands under the table and the sophisticated styling. But above all I want you to have fun, be yourself and enjoy your wedding.
