

Marek HOŘAVA

WEDDING CINEMATOGRAPHER

I love simplicity, light, beauty and emotions. While working, real emotions are the primary focus of my attention, while I do not like unnatural posing and faked scenes. Only thanks to natural emotions and real developments can I create timeless movies that will grow in value over your lifetime.

After seven successful years of wedding production, I have started to work internationally in many countries especially USA, where clients seek me out for weddings.

I believe by investing time and care that I produce for you, a film of high quality and distinctly unique.

This is not a cookie-cutter wedding film this is about you! I appreciate you taking the time to consider me and I would love to learn more about you and your story.
